PRIVATE CLOU

The new mobility solution to extend your space over wireless.

The DIGITUS "Private Cloud" Drive makes it possible to get an wireless access to users' external storage media on an easy and mobility way. It offers a storage extension for the limited space of mobile devices such as iPAD and Smartphones. Whether you want to watch Video, Photos or accessing to your Music and Documents, the DIGITUS "Private Cloud Drive" transfers all data to your Windows, MAC, Android or iOS systems. You can either access "Private Cloud" Drive by browser from the PC or Notebook as well as accessing it from Tablet PC and Smart Phones from downloaded APP called Digitus "Private Cloud" to have full access to your data on the SD Card or USB key. Three users at the same time can use the "Private Cloud Drive". The device has an internal battery that can operate continuously up to 4 hours. "Private Cloud" Drive comes with the WiFi 802.11 b/g/n bridge function that not only provides wireless access to the data in the storage, and at the same time it also allows you to browse to Internet to download documents and music into "Private Cloud Drive". This is the fastest and most mobile way to manage your Data and Media overall.
